

# THREADY external thread cleaner

## Specifications

- Most convenient thread cleaner on the market.
- Specially designed for bolts and threadbars in sizes M10 to M120.
- Spring-loaded system ensures even pressure on thread and shaft.
- Smart design allows easy change of the inner diameter.
- Spring-load of the brushes can be easily readjusted - for ultimate cleaning.
- Vertically arranged round brushes reduce friction.
- Threads and threadshaft can be cleaned in one operation.
- Thread is cleaned of adhering dirt and smoothed at the same time.
- Extends the lifespan of the thread.
- Non-standard sizes and versions with offset gear are available on request.
