

Important safety instructions

ATTENTION!

When using the torque wrench, never put your hands on the reaction arm!

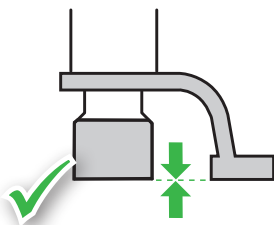

Not permitted:

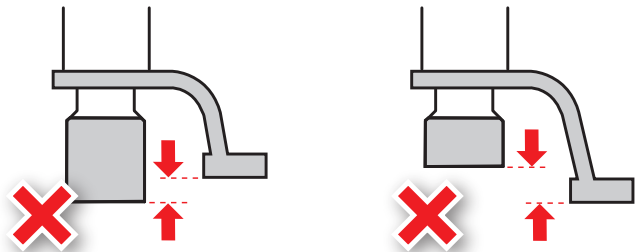

- rehit after final torque
- manual rotation after final torque
- restart if power is not sufficient to release (contact TN)

WARNING: If the torque wrench is used improperly, its service life may be shortened and the warranty will be void.

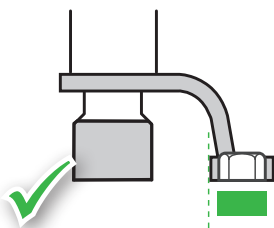

CORRECT: The reaction arm and the impact sockets are at the same height.

WRONG: The reaction arm of the torque wrench is too short (left) / too long: (right)

CORRECT: The reaction arm rests completely against the nut/bolt head

WRONG: Do not lean on the edges of the reaction arm!
